MICROSOFT MANAGED PARTNER

MICROSOFT CLOUD PLATFORMS PRACTICE

Copilot Agent Governance & Implementation

"From agent creation to action - governed end-to-end.
Accelerate business transformation by automating processes with Copilot."

We connect **Copilot innovation** with secure collaboration, information protection, and governance from day one - ensuring productivity gains are built on a **strong security and compliance foundation**.

Our Get Ready for Copilot Approach

We partner with you to build a tailored Copilot enablement and deployment plan that fits your organization.

STEP 1

Environment Review

Review your environment and configuration to enable Copilot solution deployment

STEP 2

Agent Governance

Configure agent environment and governance controls for secure operations

STEP 3

Use Cases & Prioritization

Identify use cases, personas, prioritize requirements, and license needs

STEP 4

Develop Copilot Agent

Build an intelligent automation solution based on your prioritized requirements

STEP 5

Solution Documentation

Requirements, as-built configuration, and environment recommendations

STEP 6

Knowledge Transfer

Empower your team to manage and extend your Copilot agent solution

EXPECTED OUTCOMES

What You Walk Away With

1. **High-impact automation opportunities** documented with personas, workflows, and success metrics
2. **Prioritized use cases** aligned to business and technology requirements with license advisory
3. **Environment readiness** evaluated and configured to enable Copilot agent creation
4. **Copilot Studio configured** with best practices for agent consumption, authoring, and management
5. **Working Copilot agent** developed and implemented aligned to your solution goals
6. **Knowledge transfer complete** so your team can manage and evolve the solution independently

COPILOT AGENT GOVERNANCE & IMPLEMENTATION

From Agent Creation to Action - Governed End-to-End

Our Copilot Expertise

End-to-end capabilities across the Copilot lifecycle

1

Tenant & Data Readiness

Assess Microsoft 365 and Copilot readiness across data, compliance, licensing, and adoption to identify gaps and define a clear, secure path to deployment.

2

Use Case Envisioning & Proof of Value

Identify and prioritize high-impact Copilot and agent use cases through structured workshops that align scenarios to business outcomes and validate value before scale.

3

Copilot Training & Adoption

Deliver role-based training and adoption programs that build awareness, enable practical usage, and drive sustained Copilot adoption across the organization.

4

Agent Governance & Deployment

End-to-end support for Copilot agent solutions - from use case design and environment configuration to development, documentation, and knowledge transfer.

5

Data Security for AI

Strengthen information protection, governance, and compliance to ensure Copilot and agents operate safely and in alignment with organizational risk requirements.

6

Copilot Extend & Operationalize

Ongoing advisory and optimization to monitor adoption, refine governance, and continuously evolve Copilot capabilities to maximize long-term value.

About Centric Consulting

Centric Consulting is an international management consulting firm with unmatched expertise in business transformation, technology implementation, and adoption. Founded in 1999, Centric has grown to 1,400+ employees and 14 locations across the country and India.

We partner with you to build a tailored Copilot enablement and deployment plan that fits your organization - from governance to go-live.
