MICROSOFT MANAGED PARTNER

MICROSOFT CLOUD PLATFORMS PRACTICE

Copilot Agents Governance & Dev

"From agent creation to action - governed end-to-end.
Accelerate business transformation by automating processes with Copilot."

We connect **Copilot innovation** with secure collaboration, information protection, and governance from day one - ensuring productivity gains are built on a **strong security and compliance foundation**.

Our Get Ready for Copilot Approach

We partner with you to build a tailored Copilot enablement and deployment plan that fits your organization.

STEP 1

Environment Review

Review your environment and configuration to enable Copilot solution deployment

STEP 2

Agent Governance

Configure agent environment and governance controls for secure operations

STEP 3

Use Cases & Prioritization

Identify use cases, personas, prioritize requirements, and license needs

STEP 4

Develop Copilot Agent

Build an intelligent automation solution based on your prioritized requirements

STEP 5

Solution Documentation

Requirements, as-built configuration, and environment recommendations

STEP 6

Knowledge Transfer

Empower your team to manage and extend your Copilot agent solution

EXPECTED OUTCOMES

What You Walk Away With

1. **High-impact automation opportunities** documented with personas, workflows, and success metrics
2. **Prioritized use cases** aligned to business and technology requirements with license advisory
3. **Environment readiness** evaluated and configured to enable Copilot agent creation
4. **Copilot Studio configured** with best practices for agent consumption, authoring, and management
5. **Working Copilot agent** developed and implemented aligned to your solution goals
6. **Knowledge transfer complete** so your team can manage and evolve the solution independently

COPILOT AGENTS GOVERNANCE & DEV

From Agent Creation to Action - Governed End-to-End

Our Copilot Expertise

End-to-end capabilities across the Copilot lifecycle

1

Tenant & Data Readiness

Assess Microsoft 365 and Copilot readiness across data, compliance, licensing, and adoption to identify gaps and define a clear, secure path to deployment.

2

Use Case Envisioning & Proof of Value

Identify and prioritize high-impact Copilot and agent use cases through structured workshops that align scenarios to business outcomes and validate value before scale.

3

Copilot Training & Adoption

Deliver role-based training and adoption programs that build awareness, enable practical usage, and drive sustained Copilot adoption across the organization.

4

Agent Governance & Deployment

End-to-end support for Copilot agent solutions - from use case design and environment configuration to development, documentation, and knowledge transfer.

5

Data Security for AI

Strengthen information protection, governance, and compliance to ensure Copilot and agents operate safely and in alignment with organizational risk requirements.

6

Copilot Extend & Operationalize

Ongoing advisory and optimization to monitor adoption, refine governance, and continuously evolve Copilot capabilities to maximize long-term value.
